

Organizations Providing Respiratory Fit Testing

The information provided below has been gathered to assist our members who may be required to have workers fit tested at this time. This document is solely a list of those companies, that we are aware of, who are currently conducting fit testing.

The NLCSA does not have knowledge relating to cleaning/disinfecting procedures implemented during COVID-19 or any limitations that a company may have in conducting the fit testing. The onus is on the employer to have these conversations with the provider.
